A Monthly Newsletter for UNH Marine Program Faculty, Staff and Students  
November 2003, Volume 2, Number 8

## New Marine Program Web Site is On-Line!

At long last, we are proud to present the totally new and improved Marine Program web site. You can view it at <http://marine.unh.edu> or <http://www.marine.unh.edu>. But read on before you do.....

With the new site, we have strived to provide people using our site with a user friendly portal to 'all things marine' at UNH.

**New Capabilities & Information:** In addition to serving as a portal to existing web sites about our programs, facilities and centers at UNH, we completely overhauled the way in which we present who we are and what we do.

**Faculty, Staff & (in the near future) Graduate Students** are highlighted in one section to showcase who we are. Faculty can be accessed alphabetically, by disciplinary interests or through a limited keyword search. Staff and Graduate Students will be listed alphabetically. [Please provide information on individuals who should be included in this section. We are in need of several photos.]

**Fellowship, Job and Research Funding Opportunities** that we hear of will now be posted to specific pages on the site and will eliminate the constant barrage of e-mail notices that we have processed in the past. We also want

to serve as the place for undergraduates interested in marine research and work-study opportunities to look for opportunities (this is a great recruiting tool as well). [Please provide us with opportunities that you know of so that we can maintain an up to date and useful site.]

**Graduate and Undergraduate Studies** are highlighted in sections that now summarize the degree programs, courses and opportunities available to UNH students interested in marine studies. We have created a listing of recent graduate students and their thesis titles (again, this should provide great insight on our programs). [Please look at this site and provide us with students that we have missed.]

**Research** is also highlighted in a section designed to highlight the activities of our faculty, centers and cooperative institutes. [This section is in particular need of new information to highlight recent publications and particularly interesting research activities of our faculty.]

Please take a few minutes to browse through the site – don't hesitate to let us know if you find information that is incorrect and/or any omissions, or of addition information or links that would be of use to our users. Your input is welcome and important to us. [We are particularly interested in information on the areas noted in orange above. We also wish to provide a listing of instrumentation available for common use, links to on-line data, articles about you that appear in the press, etc...] Please contact [linda.wade@unh.edu](mailto:linda.wade@unh.edu) with comments, suggestions, or more information.

## Marine Program Holiday Party!

The annual Marine Program **Holiday Party** will be held at the Elliott Alumni Center on Monday, December 8<sup>th</sup> from 3:30 – 5:30PM. We hope to have a great turn out so please encourage your students and staff to attend. Light snacks and liquid refreshment will be served! Please join us in kicking off the holiday season.

## Marine Science Graduate Fellowships!

Approximately 10 graduate fellowships are available for next year as part of the recently announced Marine Science Fellowship Program. Please see the Marine Program web site for the application package and more information.
